- Read more about DMH at www.dmh-agrar.com

As a classic, German, Hanseatic trading house, we are the reliable link between producers and consumers and serve the national and international fermentation, food, fertilizer and feed industries as well as the energy sector on all scales. We trade with international large-scale industry as well as with farmers or other end-users like e.g. small rum producers.

DMH... Core Business

DMH trades in conventional and certified organic agricultural products within and across national borders around the world – a business that has rewarded us with steady growth over the years. Having built up a strong classic volume business, we are now focusing on creating and developing niche segments, particularly in the area of organic certified and GMO-free agricultural products.

DMH ... Fruit Business

Think global, act local - Serbia & the Region

- ❖ DMH buys only from first class certified cold stores that are mainly located inside Serbia resp. in surrounding countries.
- ❖ DMH manages the whole logistical infrastructure for our buyers, delivers good fruit quality from reliable, renowned producers based on guaranteed delivery terms and annual and/or perennial contracts.
- ❖ DMH offers to the cold stores a wide range service not limited to buying fruit products but also supplying fertilizers.
- ❖ Through its affiliated office in Belgrade DMH is present in the local market to handle purchases, controlling, logistics and execution.
- ❖ All invoicing is done via DMH, Hamburg. In other words DMH combines contracting with suppliers and buyers as a German company with executing contracts via a local office with dedicated manpower.
- ❖ DMH offers to its European industrial buyers first class quality products based on the generally accepted standard parameters.

The focus of our activities is Europe. In addition to our headquarters in Hamburg, we operate a branch office in Belgrade, which is responsible for our business in the Balkans. Besides that we work on a German as well as a European level in cooperations with other companies in order to bundle competences in the interest of our suppliers and customers.

Politically and economically, Serbia occupies a strategic geographical position in the heart of the Balkans. While among the leading candidates for EU membership, it is also becoming a key supply and logistics hub as much for Russia, which needs to close the trade gap opened by its embargo on foodstuff trade with EU members and Turkey, as for other East European markets. Even Turkey is pushing for closer agri-trade relations with an up and coming Belgrade.
