

Quality FA 4 – Soapstock splitting
Sustainable Vegetable Mixed Fatty Acid

GENERAL PRODUCT SPECIFICATION

Origin Europe

Physical and chemical characteristics	
Crude fat	min 95%
Soaponifiable matter	min 95%
Unsoaponifiable matter	max 2,2%
Moisture and volatile matters	max 1,5%
Insoluble in petrol-ether	max 1,3%
Senzoric characteristics (at 20°C)	
Appearance: Dark brown viscosity liquid.	
Smell: Characteristic to product, based on used raw material.	
Microbiological characteristics	
CFU	max 12.000.000 CFU/g
Total amount of yeast and molds	max 200.000 /g
Echerichia coli	negative in 50g
Salmonella	negative in 50g
Clostridium perfringens	negative in 50g
Microbiological validity	
Provided by application of concentrated sulphuric acid in hydrolisis process. Heating the fatty blend with direct steam.
